

Meet Our New Business Development Manager

Learn more about Paul

Name: Paul Wilson
Position: Business Development Manager
Interests: Golf, Cricket, Team Quizzes, Travelling in the UK.

With 25 years in the HVAC industry I will be working on developing Quartz specifications through M&E consultations from initial design to pre and post tender stages. Working with the in house technical teams, I will provide a full design service.

As an active CIBSE member I can offer CPD presentations to consultant engineers throughout the UK.

Upcoming Events

CHILLVENTA

We will be exhibiting this year at Chillventa Nuremberg from 16th - 18th October! We look forward to seeing some familiar faces there but most importantly all the new faces that we would love to meet.

If you would like to schedule in a meeting please do get in touch with us for more information.

Crossrail Compliant Units

Quartz worked to the specifications of 'Crossrail' to develop new ducted and

perimeter wall-mounted ranges of product, removing plastic components such as drain points and grilles to implementing LSZH (Low smoke zero halogen) cabling throughout, a high specification insulation and the exposed units having a Axalta corrosion proof finish, just to cover a few of the design changes our dedicated design team were involved in.

Case Studies

Read our new case studies to learn more about what bespoke solutions Quartz can bring to your project.

Paddington Station

A 'Crossrail' compliant product development for a new railway infrastructure.

Wellington Place (Leeds)

New city centre urban development, high specification package

Royal Albert Dock

Large scale, high specification, short lead time project.

Meet the new addition to the Quartz Team

Having previously worked in the material control department, Elyse Martin has joined us over summer as project coordinator.

We are now on Instagram!

Why not have a look at our Instagram page where we post videos, product pictures and document our work as TEV.
